SARS-CoV-2 – initial observations on epidemiology and evolution

This talk will describe some current efforts to track, understand, and control the current corona virus pandemic. We will review basic epidemiology and discuss the dynamics of transmissions, as well as monitoring efforts aimed to contain local outbreaks. We will also compare different scenarios of viral evolution.

Friday, May 08, 2020, 16:30

Online via Zoom

Hosted by David Gross and Joachim Krug
